

MUHAMAD IMRAN BIN KHASRIN

Software Developer

• Sungai Buloh, Selangor • imrankhasrin@gmail.com • + 6019-8071707 • www.linkedin.com/in/imran-khasrin1

SUMMARY

Junior Java Software Developer with hands-on experience in building, enhancing, and maintaining backend systems using Spring Boot and SQL databases. Experienced in RESTful API development, system troubleshooting, and collaborating in cross-functional teams to deliver reliable and production-ready applications.

WORK EXPERIENCE

PORT KLANG FREE ZONE SDN BHD

Klang, MY

Data Analyst Internship

Sep 2025 - Dec 2025

- Cleaned and analyzed large-scale procurement datasets using Excel and SQL to identify cost-saving opportunities, supplier performance trends, and purchasing inefficiencies.
- Designed and maintained interactive Power BI dashboards to visualize key metrics such as purchase order volume, spending distribution, and vendor efficiency, enabling real-time decision-making for management.
- Generated weekly and monthly performance reports by translating complex data into actionable insights for supervisors, leading to a 15% improvement in procurement cycle time through data-driven recommendations.
- Collaborated with IT teams to validate data pipelines and ensure system data consistency.
- Worked alongside procurement and finance teams to align data reporting with business goals and improve data collection processes.

PANTAI BHARU HOLDINGS SDN BHD

Klang, MY

Junior Web Developer Internship

Oct 2021 - Feb 2022

- Collaborated with senior developers to build and maintain internal web applications using HTML, CSS, JavaScript, and PHP. Identified and resolved over 20% of frontend bugs in the production system, improving system stability and user experience.
- Developed a cafe food-ordering web app that streamlined the ordering process, reducing wait times by 25%.
- Built a customer information portal for the Proton department using PHP and MySQL, enabling efficient data entry and retrieval.
- Participated in code reviews, adopted version control with Git, and followed Agile development practices to enhance team productivity and code quality.

EDUCATION

UNIVERSITI TEKNOLOGI MARA

Shah Alam, MY

Bachelor Of Information Systems (Hons.) Intelligent Systems Engineering

2022 - Present

CGPA: 3.41

Relevant Coursework: Machine Learning, Data Mining, Time Series Analysis and Forecasting, Optimization Algorithms and Applications, Fuzzy Logic, Programming For Data Science

POLITEKNIK SULTAN HAJI AHMAD SHAH (POLISAS)

Kuantan, MY

Diploma In Business Information Systems

2018 - 2021

CGPA: 3.68

Relevant Coursework: Web development, Web Programming, Database Management System, Project Management, Digital Entrepreneurship Development

PROJECTS

Smart Internal Workflow Approval System

Jan 2026

- Built a scalable approval system handling file uploads, configurable workflows, and real-time notifications
- Implemented secure file access control, ensuring only authorized users view attachments
- Developed advanced search functionality with full-text search and filter combinations
- Deployed fullstack application to Railway (backend) and Vercel (frontend) with cloud PostgreSQL
- Reduced simulated approval cycle time by 40% through automated reminders and streamlined UI
- **Tech Stack:** Java, Spring Boot, Spring Security, JPA, PostgreSQL, React, TypeScript, Tailwind CSS, Telegram Bot API, Git, Docker, Liquibase, Postman

AI-Powered Job Hiring Platform Using React (CEPATHIRE)

Dec 2025

- Developed a full-stack job hiring platform for job seekers (part-time) and employers who have trouble creating postings for the job vacancy.
- Implemented AI-assisted workflows to auto-generate job postings and recommend candidate matches using LLM APIs.
- Implemented basic error handling, logging, and retry mechanisms to improve system reliability.
- Integrated Convex backend for real-time data syncing and secure authentication.
- **Tech Stack:** React 19, TypeScript, Tailwind CSS 4, TanStack Router, TanStack Query, Convex Backend, Vercel, Vite, Lucide React, Vitest, Git / GitHub (Version Control)

Web Comic Aggregation Platform (WibuComic)

Nov 2025

- Developed a web-based comic reading platform using TypeScript and React that focused on performance and maintainability.
- Built backend logic using Supabase Edge Functions to handle API requests and data processing.
- Integrated multiple REST APIs to fetch and display comic content dynamically.
- Implemented responsive and reusable UI components using Tailwind CSS.
- Deployed and maintained the application using Netlify.
- Applied version control (Git) and followed with clean and modular coding practices.
- **Tech Stack:** TypeScript, React, Supabase Edge Functions, REST APIs, Tailwind CSS, Netlify, Git/GitHub

PERSONAL SKILLS

- Programming Languages: Experienced in JavaScript (ES6+), TypeScript, PHP, SQL, Python, JAVA
- Web Frameworks and Database: React.js, Node.js (Express), Laravel (basic), Supabase, PostgreSQL, MySQL
- Data Visualisation: Power BI, Tableau

ACHIEVEMENTS

Dean's List Award (Bachelor of Information Systems (Hons.) Intelligent Systems Engineering)

- Semester 3 to Semester 6

Special Industrial Award (Diploma in Business Information Systems)

- Awarded by MKZ Global Resources

Dean's List Award (Diploma in Business Information Systems)

- Semester 1 to Semester 4
